

Sadra Daryabaz

Aspiring Computer Science Student

CONTACT

Email: sadra.daryabazz@gmail.com
Website: sadradaryabaz.com
GitHub: github.com/sadradaryabaz
Location: Tabriz, Iran

EDUCATION

High School Diploma (Expected 2027)
Meshkat Nour, Tabriz, Iran
Focus: Mathematics and Computer Science

PROFILE

Aspiring Computer Science student with strong interest in software development, artificial intelligence, and problem-solving. Completed Harvard CS50 courses in Python and Artificial Intelligence and developed several independent programming projects including web applications and an AI-based study planner. Experienced with Python, JavaScript, and modern development tools, with additional exposure to professional engineering environments through internship training. Seeking to pursue a Computer Science degree in the United Kingdom and further develop skills in software engineering and AI.

TECHNICAL SKILLS

Programming: Python, JavaScript
Web Development: HTML, CSS, Basic React
Tools: Git, GitHub, VS Code
Concepts: Problem Solving, Algorithms, Debugging, Software Development Basics

PROJECTS

Portfolio Website

Website: www.sadradaryabaz.com

- Designed and developed a personal portfolio website to showcase projects and technical skills
- Focused on clean layout, responsive design, and structured presentation of projects
- Used the website as a platform to document and present independent learning projects

Task Manager Web Application

GitHub: github.com/sadradaryabaz/task-manager

- Built a web-based task management application for organizing and tracking daily activities
- Implemented task creation, deletion, and completion tracking features
- Practiced front-end development concepts and user-interface design

AI Study Planner

GitHub: github.com/sadradaryabaz/ai-study-planner

- Developed a Python-based study planning system that generates optimized study schedules based on available time and task priorities
- Implemented algorithmic logic to improve time management and automate planning decisions
- Focused on problem-solving and logical structuring of scheduling tasks

Weather Application

GitHub: github.com/sadradaryabaz/weather-application

- Developed a lightweight weather application that retrieves real-time weather data from public APIs
- Implemented efficient API requests and dynamic user interface updates using JavaScript
- Strengthened practical understanding of asynchronous programming, API data handling, and front-end integration

PROFESSIONAL EXPERIENCE

Internship Trainee

Alborz Engineering Company — Tabriz, Iran
Apr 2022 – May 2026

- Assisted with introductory programming and technical tasks in a professional engineering environment
- Observed real-world engineering workflows and software development practices
- Applied problem-solving and debugging approaches while interacting with practical technical projects

CERTIFICATIONS

- CS50's Introduction to Programming with Python Harvard University (edX)
- CS50's Introduction to Artificial Intelligence with Python — Harvard University (edX)
- Artificial Intelligence Course — aiolearn Institute, Tehran
- Algorithms and Programming — aiolearn Institute
- Python Programming Fundamentals — aiolearn Institute
